DO/CD MOU: status

Amber Boehnlein

MOU

- Agreements originally signed around 2000 or 2001
  - Very few updates since then
- In general the support from the CD side met or exceeded the agreements
  - Better service in most metrics (more data transferred, stored, delivered, bigger farms run efficiently
  - Typically used less effort than the original estimates
- Updates intended to be valid through data taking

MOU Format

- The 2000 format was serviceable
  - Services and Service Levels
  - Components
  - Hardware
  - Joint Responsibilities
  - Computing Division Responsibilities
  - Experiment Responsibilities
  - Effort
  - Procedures
  - Special Considerations
- Proposed only moderate and local updates to format
- Original version is a 47 page behemoth with ~25 one page MOUs.
  - Propose an online version with individual MOUs updateable at need.

Software support*		stable		D0tools/D0runjob	
CLuED0		stable		Long term collaboration support	
Database Application support		not written		Currently working to a task force agreement	

REX Action Items

- No real surprise that most of the open issues are in these sections.
  - REX is an institutional member of the DO experiment
  - The collaboration is evolving
  - Updates are timely now as we are facing choices
- Most of the MOUs can be signed with the knowledge of open issues
  - Simple expedient of noting the open issues
  - Most open issues will not be resolved quickly.
  - Adopt a process of reviewing and updating once a year for the Run II review?
